DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/20/07 has been entered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Amend the claims as follows:

Withdrawn claims 4, 5, 6, and 8, have been rejoined (see below as to the explanation of rejoining these claims).

In claim 5, line 9, '/' is deleted and replaced with "or", so the claim reads "can be connected or blocked in response ..."

Claim 9 is cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Larry Mendenhall on September 27, 2007.

Election/Restrictions

Claim 1 is allowable. The restriction requirement among the species as set forth in the Office action mailed on 9/5/06 has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 9, directed to a species represented by figure 5 is withdrawn from further consideration and has been cancelled by examiner's amendment, as seen above, in order to place the application in condition for allowance because it does not require all the limitations of an allowable generic linking claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-8 and 10 are allowed.

Art Unit: 2858

In regard to claim 1, the prior art does not teach or render obvious a current range switching portion having a plurality of series connections each comprising a current buffer with a switch connected in series with a current measurement resistance, wherein the respective series connections are connected in parallel to each other, each of the current buffers with switches has an output stage capable of being connected or disconnected and a pre-stage portion controlling the output stage in response to a control signal supplied thereto and in the combination as claimed.

Claims 2-8 and 10 further define allowable claim 1 and are also allowable.

An English translation of pertinent art Mori (JP-61227635) that appears on the IDS filed 6/3/05 is included as it should appear on file.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff Natalini whose telephone number is 571-272-2266. The examiner can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Hirshfeld can be reached on 571-272-2168. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
